SENEEDIA: Reed’s Rise on Defense Committee Important to RI and the Nation

WASHINGTON, DC – The Southeastern New England Defense Industry Alliance (SENEEDIA) released a statement today congratulating United States Senator Jack Reed on his swearing-in to a fourth term in the United States Senate and reflecting on his rise to the senior Democratic post on the powerful Senate Armed Services Committee.

“SENEEDIA congratulates Senator Reed on his fourth term in the United States Senate and his first as the Democratic leader of the Armed Services Committee,” said Molly Donohue Magee, executive director of SENEEDIA. “We look forward to continuing our collaboration with the Senator in his efforts to provide for our service members, bolster our national defense capabilities, and boost our local economy.”

“For years, under Democratic and Republican majorities alike, Senator Reed has been an effective advocate for the Southern New England defense industry and the solutions we provide to the American warfighter,” added Tim DelGiudice, chairman of SENEEDIA’s board of directors. “As he ascends to this senior post on a committee of vital importance to our industry, there’s no doubt Senator Reed’s established legacy as a champion for local defense jobs and a bipartisan leader on critical national issues will only become more impressive over the coming years.”

- About SENEEDIA -

The Southeastern New England Defense Industry Alliance (SENEEDIA) is a 501c(6) organization formed in 2002 to identify, champion and coordinate initiatives that contribute to the national security of the United States and the preservation and growth of the regional defense sector. SENEEDIA’s membership is comprised of defense-oriented organizations hailing from Connecticut, Massachusetts and Rhode Island, representing industry, academia and non-profit interests. More information on SENEEDIA can be found at www.senedia.org.
