SENEdia welcomes MxD as a new Strategic Partner

SENEdia is pleased to welcome the Manufacturing USA defense manufacturing innovation institute MxD from Chicago, IL as a strategic partner to the alliance. MxD works to improve the manufacturing sector with focus areas in cybersecurity, defense collaborations, digital engineering, workforce development, future factory, and supply chain. MxD is home to The National Center for Cybersecurity in Manufacturing which demonstrates existing cybersecurity technology on its factor floor, develops new tools to address very specific pain points for manufacturers, and works with industry and government to figure out how to get these tools to small and medium-sized manufacturers. MxD hosts the Cyber Marketplace, which enables manufacturers of all sizes to identify weak points and receive feedback through the completion of an assessment. The marketplace then suggests proven cyber solutions tailored to address these needs. More information about MxD can be found at www.mxdusa.org.
